Triambakk R B

Chennai, India | +91 9361241899 | rb.triambakk@gmail.com | linkedin.com/in/triambakk-rb | github.com/Triambakk

Summary

Computer Science undergraduate with experience building data pipelines, Python-based AI applications, and REST APIs. Built a FastAPI/PostgreSQL ETL integration engine, a RAG-based PDF question-answering application, and a Django REST booking platform. Ranked 131st among 23,000+ teams in the Amazon ML Challenge 2025.

Technical Skills

Languages: Python, SQL, C, C++
Data & Analytics: Data Analysis, Data Cleaning, EDA, ETL Pipelines, Pandas, Excel, Google Sheets, PostgreSQL, SQLAlchemy
AI & Generative AI: Machine Learning, LLMs, RAG, FAISS, Sentence Transformers, Embeddings, Gemini API, OpenCV
Backend & APIs: FastAPI, Django, Django REST Framework, REST APIs, JWT, Pydantic, OpenAPI/Swagger
Cloud & Tools: AWS, Docker, Git, GitHub, Postman, Streamlit, Supabase, SQLite
CS Fundamentals: DSA, OOP, DBMS, Operating Systems
Soft Skills: Problem-Solving, Analytical Thinking, Communication, Teamwork, Time Management

Experience

AI Data Analyst Intern Oct. 2026 – Present
InAmigos Foundation (IAF) *Remote — Bilaspur, Chhattisgarh*

- Analyzed non-profit program datasets using **Excel**, **Google Sheets**, and **Pandas** to clean, structure, and explore data for decision-making insights.
- Wrote **SQL** queries to extract and aggregate data, and resolved inconsistencies and quality issues in raw datasets.
- Communicated findings through summaries and charts within AI and data analytics workflows in the NGO sector.

Projects

PDF Question-Answering Assistant (RAG) GitHub Oct. 2026
Python, Streamlit, FAISS, Sentence Transformers, Gemini API

- Built a **Retrieval-Augmented Generation (RAG)** app that answers questions from uploaded PDFs: text is split into 1,000-character chunks and converted to embeddings using **Sentence Transformers**.
- Used **FAISS** vector search to retrieve the top 3 relevant passages and **Gemini API** to generate answers with source citations and page numbers, with a fallback for unanswerable questions.

B2B SaaS Integration Engine GitHub (| Live Demo) Apr. 2026 – Jun. 2026
Python, FastAPI, Gemini 2.0 Flash, PostgreSQL, Pydantic

- Built a **FastAPI ETL pipeline** to clean messy CRM data (HubSpot, Salesforce) into a standard 10-field **PostgreSQL** format.
- Automated column renaming using **Gemini 2.0 Flash**, 40+ mapping rules, and fuzzy string matching; validated data with **Pydantic** and handled duplicate emails using **SQLAlchemy** insert-or-update logic.
- Containerized with **Docker**, deployed on Render, and documented the API with **OpenAPI/Swagger** and Postman tests.

DIAGNO – Diagnostic Booking Platform GitHub Sep. 2026 – Oct. 2026
Django, DRF, PostgreSQL, React

- Built a full-stack appointment booking platform using **Django REST Framework**, PostgreSQL, and React, with a multi-step booking flow and **JWT authentication**.
- Prevented double-booking using transactions and database constraints; added role-based permissions for patients and staff and wrote **pytest** tests for authentication, validation, and booking flows.

Smart Voting System GitHub Sep. 2025 – Nov. 2025
Python, OpenCV, Face Recognition

- Built a voting app using real-time **face recognition** (OpenCV) for voter verification, with blink detection to block photo spoofing and backend tracking to enforce one vote per voter.

Achievements

- **Amazon ML Challenge 2025**: Ranked **131st among 23,000+ teams** (SMAPE 44.3) by building and training machine learning models on large-scale train/test data using an **NVIDIA H200 GPU**.

Education

SRM IST - Kattankulathur Chennai, TN
B.Tech in Computer Science and Engineering (CGPA: 8.98/10.00) *2023 – 2027*

Hindustan International School Padur Chennai, TN
Class XII - CBSE (82.4%) *2021 – 2023*

Certifications

- AWS Certified Developer – Associate (2026) | SAP Certified – Backend Developer – ABAP Cloud (2026)
- NPTEL: Machine Learning (2025) | NPTEL: Database Management Systems (2025)
